

Our "auto-related" waste service for clients.

Fleet Guardian, LLC

Intelligent Fleet Care.

Because you are a valued client of ours, we offer, as a *courtesy*, recycling and disposal service for your:

- **Used tires**
- **Waste oil**
- **Waste antifreeze (coolant)**
- **Used auto/truck batteries**
- ~~Dead bodies of space aliens from planet Gorp*~~
- **Used oil & fuel filters**

There may be (very) small fees for certain items and we do have restrictions on the quantities (and types) of stuff we can accept (these restrictions are "by law" and not our choice! Don't yell at us!), but don't fear!

For many of our clients (probably you!) these restrictions are not a burden and we could easily take the eyesores lying around your "fleet parking area" and get rid of your stuff in one or two trips.

But please! Don't just "show up"! (We may be busy trying to bury our own space alien bodies)

It's important that you read this (very brief!) info sheet **first**, because...

We don't want you to bring too much,
 We want you to know what charges to expect (if any),
 And so we don't want you to waste a trip...

Scrap Tires

- Limited to 4 tires per month, per client.
 We can take a maximum of 40 tires per month, total.
 Dept of Health requires tires be stored inside; therefore, we cannot take more than 40 extra tires per month, in addition to our own...
- Any condition! Even shredded tires.
- Will go to certified tire scrapper.

Prices:

Tire Size/Type	Fee
P (15" and smaller)	4.25
LT (16" and 16-1/2")	6.41
17" and bigger on-highway tires.....	13.60
Large Equipment tires (backhoe, tractor, etc)	13.60
Small Equipment tires (mower, etc).....	4.25

Our "auto-related" waste service for clients.

Fleet Guardian, LLC

Intelligent Fleet Care.

Waste oil

- 35 gallons or less per month, per client.
We can take a maximum of 1,000 gallons per month, total.

Why?

Dept of Environmental Protection (DEP) regulations require us to stay within "Small Quantity Generator" (SQG) status; disposing of more than our regulated limit will automatically re-qualify us as a "Large Quantity Generator" and... uh....we're not going thru *that* red tape.

Waste oil storage requires secondary containment systems for environmental safety.
(We have limited waste oil storage capabilities.)

- Waste oil must contain engine oil, diesel fuel or gasoline only. If it has been commingled with ANY other types of fluid, we cannot and will not accept it.
- Will get hauled away by licensed/certified/insured waste hauler to be recycled as processing fuel.

Prices:

Currently Free of charge
(As of June 10, 2009. Please call for current pricing)

Waste coolant:

- Coolant must "test out" to be good to -20°F (or COLDER).
If it is only good to -19°F (or warmer), it is considered wastewater, which is not accepted.
- 35 gallons or less per month, per client.
We can take a maximum of 1,000 gallons per month, total.

Why?

Dept of Environmental Protection (DEP) regulations require us to stay within "Small Quantity Generator" (SQG) status; disposing of more than our regulated limit will automatically re-qualify us as a "Large Quantity Generator" and... uh....we're not going thru *that* red tape. (having déjà vu?)

Waste oil storage requires secondary containment systems for environmental safety.
(We have limited waste oil storage capabilities.)

- Waste coolant must contain coolant **only**. (Any "flavor" is ok...green, orange, red...).
If it has been commingled with ANY other types of fluids, we cannot, and will not accept it.
- Will get hauled away by licensed/certified/insured waste hauler to be recycled as coolant for large scale machining operations.

Prices:

Currently Free of charge
(As of June 10, 2009. Please call for current pricing)

Our "auto-related" waste service for clients.

Fleet Guardian, LLC

Intelligent Fleet Care.

Old car and truck batteries:

- 3 batteries or less per month, per client.
We can take a maximum of 45 batteries per month, total.
Dept of Health regulations require us to store inside.
We cannot store more than 45 batteries inside, in addition to our own...
- Any battery style accepted.
Top terminal, side terminal, etc...
- Will get hauled away by Interstate Battery to be recycled.

Prices:

Currently Free of charge
(As of June 10, 2009. Please call for current pricing)

Waste oil & fuel filters:

- 10 filters or less per month, per client. We can take a maximum of 70 filters per month, total.

Why?
Waste filter storage requires secondary containment systems for environmental safety.
(We have limited waste oil storage capabilities.)
- Filters must be drained overnight.
They cannot contain more than 10% of their capacity of the original fluid they filtered.
- Will get hauled away by licensed/certified/insured waste hauler to be recycled: sheet metal exterior as rebar and residual fluids and filtration media as processing fuel.

Prices:

Size/Capacity	Fee
Less than 1 quart (typical 4 cylinder car filter)90¢
1 quart (typical V6, V8, small truck filter)	1.72
1.1 to 3.0 quarts (typical small to medium diesel)	3.65
3.1 to 4.9 quarts (typical "Over the Road" truck).....	6.22
5+ quarts.....	call
